DESCRIPTION

Direct operated solenoid spool valve with 4 connections in 5 chamber design. With the solenoids deenergised, the spool is held in the center position by the spring (4/3), or switched back to the offset position (4/2). With the impulse spool (4/2), the spool is held in the switching position by the detent. Intrinsic safety is achieved by limiting the electric energy in the solenoid circuit by means of a separate intrinsically safe power supply. Therewith sparking is prevented from forming.

APPLICATION

These valves are suitable for applications in explosion-hazard areas, open cast and also in mines. Spool valves are mainly used for controlling direction of movement and stopping of hydraulic cylinders and motors. Miniature values are used where both, reduced dimensions and weight are important.

ELECTRICAL SPECIFICATIONS

Protection class	IP65
Relative duty factor	Continuous operation
Switching frequency	1'800 / h
Service life time	10 ⁷ (number of switching cycles, theoretically)
Voltage tolerance	± 10 % with regard to nominal voltage
Limiting current at 50 °C	I_{min} = 90 mA (100 Ω execuiton) I_{min} = 64 mA (152 Ω execuiton)
Temperature class	T1T6
Coil resistance	100 Ω, 152 Ω
Minimum power consumption	P_{min} = 0,81 W (100 Ω execution) $P_{}$ = 0,62 W (152 Ω execution)

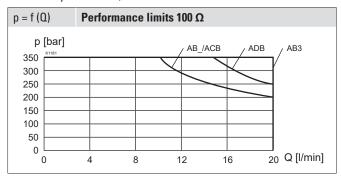

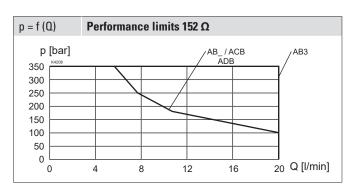

Other electrical specifications, recommended power supply and safety-related limits see data sheet 1.1-185

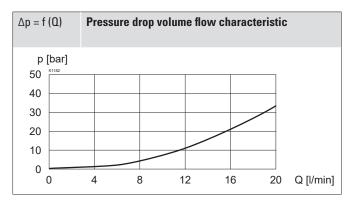

PERFORMANCE SPECIFICATIONS

Oil viscosity $v = 30 \text{ mm}^2/\text{s}$

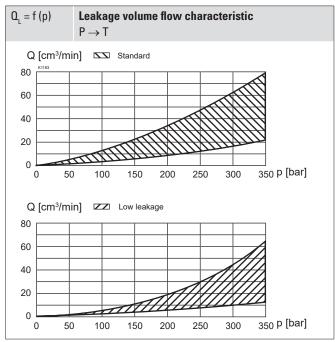

Attention!

If, because of the given operating conditions, during the switching process volume flows occur which exceed the power limit of the valve, these have to be limited by a throttle or an orifice in connection P. In case of a continuous flow through, the throttle or orifice, depending on the system behaviour, an additional heating-up of the valve is possible. This has to be appropriately taken into account by the user.

INSTALLATION NOTES

Mounting type	Flange mounting 3 fixing holes for socket head screws M5 x 40 or M5 x 50 (with distance plate BDP4/12)
Mounting position	Any, preferably horizontal
Tightening torque	Fixing screws $M_D = 5.2 \text{ Nm}$ (screw quality 8.8, zinc coated) $M_D = 9 \text{ Nm}$ knurled nut

Note!

The length of the fixing screw depends on the base material of the connection element.

Attention!

For stack assembly please observe the remarks in the operating instructions

COMMISSIONING

Attention!

Intrinsically safe valves must be controlled only by a suitable, certified power supply from out of the hazardous area (see Operating Instructions). The selection of the power supply and the wiring must be carried out by qualified personnel. Recommended power supplies and safety-related limit values according to data sheet 1.1-185
